DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 is indefinite because it is not clear how the word "artistic", is intended to further limit the device. This terminology is repeated throughout the claims.

With respect to claim 11: the phrase "each leg member and arm member is pivotally connected" is confusing. What are they connected to?

With respect to claim 17: applicant has defined a first, third and forth magnetic layer. It is not clear where the second layer is?

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-2, 6-8 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Wion.

Wion discloses in Figs 1-3, a character object comprising an artistic layer [flexible plastic sheeting], a plurality of articulation points [Figs 1 and 2], a plurality of

Art Unit: 3712

appendages pivotally connected to the torso and at least one magnet [magnetic rubber sheeting] as recited in claim 1, the first and second leg members have at least two articulated members 16, 17 19 and 20 as recited in claim 6 and the first and second arm members have at least two articulated segments as recited in claim 8.

As required by claim 7 the character object is considered to be inherently having third and fourth leg members in as much as the character object may also represent an animated object such as a dog [col 3 line 22].

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Wion in view of McKittrick, Jr. et al, hereinafter McKittrick.

Wion discloses most of the elements of this claim but for each leg member has at least three articulated segments.

McKittrick teaches the concept of providing an animated object with at least three articulated segments in each of its leg members. It would have been obvious to one of ordinary skill in the art at the time the invention was made, in view of McKittrick to provide each of each leg member the animated object of Wion device with least three articulated segments to make the device more realistic and to increase the range of motion.

Allowable Subject Matter

7. Claims 11 and 17 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.
8. Claims 3-5, 12-16 and 18-20 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
